

Sinclair Broadcasting's decision to air a Kerry smear piece over 62 of their public stations is a disgusting abuse of power, and election rigging. I am honestly scared about the future implications of the FCC being weakened by the public's perception that it does NOT serve their public interest. I'm also concerned about the future of our democracy and our national sanity if the FCC allows major broadcasters to mass broadcast what is technically smear propaganda. If Sinclair does broadcast this, can you imagine the absolute BLITZ that is going to hit the airwaves next time (after they've learned that you let them get away with it.) It'll be a massive noise machine. Just because two opposing sides are taking part in the noise doesn't make it democratic.
